Pressure Transmitter: **Smart Series 2HT**

- High Accuracy ± 0.10%.
- Ranges from 1 bar to 1000 bar.
- 20 : 1 turndown.
- 4-20mA analogue with digital communications.
- Fully HART ® compatible.
- Rugged 316 stainless steel investment cast enclosure.
- NEMA 4X, IP66 Environmental Rating.
- Stainless Steel and Hastelloy “Wetted Parts” options.
- NACE MR-01-75 compatibility.
- Compact, Robust design.
- All welded construction.

**Performance characteristics**

**Enclosure options**
- Weatherproof IP66 Protection – NEMA 4X.
- Intrinsically safe – Exia ATEX
- Flameproof – Exd ATEX

**Wetted parts options**
- Welded 316 stainless steel sensor and process connection.
- Welded Nickel Alloy (Monel) sensor and process connection.
- Welded Hastelloy sensor and process connection.

**Signal output**
- Refer to table 7.

**Process connection**
- ½” NPT External, G ½” A to ISO 228 (1/2” BSP Parallel Male, spigotted), High pressure cone and thread (autoclave) 9/16” UNF.

**Unit weight**
- Between 1.6 kg – 2.3 kg.

**Accuracy**
- For turndowns of 1:1 to 10:1 ± 0.1% of span.
- For turndowns of 10:1 to 20:1 ± 0.15% of span.

**Product applications**

The 2HT is suitable for a wide range of applications in many Industry sectors:
- Oil & Gas
- Chemical
- Petrochemical
- Water
- Power

The choice of models available ensures that the 2HT is:
- Suitable for use in corrosive atmospheres
- Resistant to chemical attack

**How can we help you?**

Delta Controls’ range of reliable pressure and temperature measurement instruments can be customised to meet individual requirements. For technical advice or to discuss your application, please contact us on +44 (0) 1252 729140
Enclosures

FINISH
All enclosures are investment cast in 316 Stainless Steel and offer environmental protection to (NEMA TYPE 4X) IP66.

NOTE: Instruments subject to National or International approval may be limited in terms of options available. See notes adjacent to relevant tables.

Material of Wetted Parts

Options U and C are all compatible with the requirements of NACE MR 01-75. Other factors in highly aggressive chemical environments may determine the final choice.

For Sour-gas and Crude applications, Code C offers the most cost effective solution.
Setting Ranges

The values shown in this table are the UPPER RANGE LIMIT (URL); a 20:1 turndown facility enables full 4 to 20mA output to be obtained for a working span equal to 5% of URL.

Unless specified, the instruments are despatched with LOWER RANGE VALUE (LRV) set to LOWER RANGE LIMIT and UPPER RANGE VALUE (URV) set to UPPER RANGE LIMIT.

Ranges shown are to gauge (i.e. atmospheric reference) absolute pressure is called up by amending the last character of the three character range code:

**NOTE:** Model R2HT is not available on ranges below 10bar.

Units

Signal Output

Note: For Flameproof model R2HT, gas group reduced to IIB+Hz when option codes 2 & B are selected. Also refer to table 1

All 4-20mA with digital signal based on the HART® protocol.

Codes A and B are only available with wetted part material codes C or U. Ref Table 4.
**Process Connection**

Other thread specifications and sizes are available without using adaptors.

Adaptors are available for applications where their use is permitted.

**Options and Treatments**

For requirements that fall outside the specifications listed above we will be pleased to advise on your particular application.

**Special Engineering**

To your individual requirements, where specified. For your convenience, enter your special listing in space provided.

**Accessories**

Order as separate items.

TECHNICAL SPECIFICATIONS

Process
Liquid, gas or vapour applications.

Ranges
0 to 1bar up to 0 to 1000bar. (0 to 16psi up to 0 to 16,000psi.)

Outputs
Two-wire, 4-20mA DC output with Digital AC signal superimposed onto it, using the HART® protocol.

Power Supply
9 to 55 Volts DC. On intrinsically safe circuits the maximum voltage is limited to 28VDC.

Load Limits
The maximum loop resistance is determined by the voltage level of the power supply.

Digital communication requires a minimum loop resistance of 230 ohms.

Indication
Optional Local Display.

Hazardous Area Certification
ATEX Intrinsically safe and flameproof. FM Intrinsically safe, flameproof and non-incendive.

Zero Elevation & Suppression
Can be set anywhere within the sensor limits, providing the required span is greater or equal to the minimum span, the lower range value does not exceed the lower range limit, and the upper range value does not exceed the upper range limit.

Normal or Reverse Action
Set by reversing the upper and lower range values.

Overpressure
316 St. St. diaphragm 2 x URL
17-4 PH or 15-5 PH diaphragm 2 x URL*
Hastelloy diaphragm 1.5 x URL*
*Subject to 1500 bar maximum.

Temperature Limits
Process: -40 to +120°C (-40 to +240°F)
Operating: -40 to +85°C (-40 to +185°F)
Storage: -50 to +110°C (-58 to +230°F)

Failure Mode Alarms
“Burnout” indication can be selected to be either minimum or maximum current output.

Humidity Limits
0 to 100% relative humidity.

Turn-on Time
Performs within specifications in less than 3 seconds, after power is applied to the transmitter including full self-diagnosis.

Volumetric Displacement
Less than 0.01cm³

Damping
Adjustable 0 to 39 seconds. This is in addition to the sensor response time of 150mS.

Temperature Limits
Process: -40 to +120°C (-40 to +240°F)
Operating: -40 to +85°C (-40 to +185°F)
Storage: -50 to +110°C (-58 to +230°F)

PERFORMANCE SPECIFICATIONS

Accuracy
For turndowns of 1:1 to 10:1 ±0.1% of Span
For turndowns of 10:1 to 20:1 ±0.15% of Span

Accuracy stated includes the combined effects of Linearity, Hysteresis, and Repeatability.

Stability
Typically less than ±0.1% URL per annum.

Linearity
±0.05% of calibrated span.

Ambient Temperature Effects
Total effect ±0.1% at maximum span.

Overrange Effect
Zero shift, 0.2% URL.

Step Response
Less than 150mS.

Vibration Effect
5g Peak sinusoidal at 5Hz to 200Hz.

Power Supply Effect
0.005% of calibrated span per volt.

Mounting Position Effect
Zero shift of up to 2mbar for a 10° tilt in any place.

RFI Effect
With lid on, in accordance with IEC801, level 3 (30V/m) over the range 20Mhz to 1000Mhz.
PHYSICAL SPECIFICATIONS

Electrical Entry
M20 x 1.5 Internal or 1/2" NPT Internal.

Process Connections
1/2" NPT External (Standard).
Autoclave, ‘Cone and Thread’ 9/16" UNF (For pressure ranges up to 1000bar.)
External G 1/2" A to ISO 228.

Process Wetted Parts
316 St. St.
17-4 PH St. St. or 15-5 PH.
Hastelloy.

Non-Wetted Parts
Lowerbody, Case and Lid  316 Stainless Steel.
Mounting Hardware  316 Stainless Steel.

Environmental Protection
IEC IP66, NEMA 4X.

Mounting
Direct process mounting as standard.
Optional 2" pipe mounting bracket.
Optional wall mounting bracket.

Weight
1.6Kg Without local display.
1.8Kg With optional local display.
0.2Kg Wall mount bracket.
0.5Kg Pipe mounting bracket.
0.2Kg Remote D-CAL unit.

PROGRAMMING, CONFIGURATION & DISPLAY FUNCTIONS

The model 2HT SMART transmitter uses the HART® protocol, enabling digital communications with host computer systems, universal hand-held communicator and any other process control system that supports the HART® protocol; as a result it can be configured and calibrated remotely.

In addition to remote digital communications, the Model 2HT has a standard local Zero and Span adjustments at the touch of a button.

If more than just local Zero and Span is required, there is the unique D-CAL local display option.

The Delta D-CAL local display is more than just a local indicator, it is, in fact, a local configurator, that can directly access more than 80% of the SMART transmitter commands, for installation, commissioning and maintenance checks.

The D-CAL local display unit is constructed from a single, stainless steel disc and when fitted gives the transmitter an environmental rating of IP65 with the lid removed.

The display gives diagnostic capabilities and shows prime variable and temperature, it also contains a user friendly, alphanumeric menu allowing access to internal functions including password protection. Passwords can be enabled to limit operation access to critical parameters during operation.

If a local display is not required, but the ability to check and configure the model 2HT is still needed, then our unique hand held configuration is a low cost alternative, when purchasing two or more transmitters.

Once the first unit is configured, simply unplug the D-CAL unit and move onto the next unit.
**Approvers**

**CENELEC / INTERTEK / ATEX**

Intrinsically Safe.
Certified to ATEX EN 50 014 and EN50 020 for use in Zone 1 hazardous areas.

Enclosure Codes 4 and all ranges.

Certificate No ITS03ATEX21213X
System Certificate

**FACTORY MUTUAL RESEARCH CORPORATION**

FM Approved for use in Divisions 1 and 2.

Enclosure Code F; see Table 5 for limitations on ranges.

Report number 1B5A6.AE

**Dimensions**

All dimensions mm (Inches)
